overall, from bow to stern cm

Boat weight
weight stated by the manufacturer kg

Make and model
if known

3. YOUR PROJECT

Number of boats to equip

Delivery country and postcode

Name

Email

TIPS FOR ACCURATE MEASUREMENTS

- Measure the boat ashore, on its trailer or existing boat cradle.
- Record everything in centimetres and take each measurement a second time.
- Take photos of the hull from the side and the front: they help confirm the choice.

Enter these measurements in the quote request on cradleb.com or send a photo of this sheet to info@cradleb.com. Reply within 24 h, free of charge and with no obligation.
